Allowable Subject Matter

Claims 21-50 are allowed. For the purposes of allowance, the original numbering of the claims has been changed.

The following is an examiner's statement of reasons for allowance:

The general concept of creating a cross-fading transition between the first and second audio works was known in the art at the time of the invention, as evidenced by Cliff (US 2002/0172379 A1). The general concept of creating movement of a sound by fading between at least four loudspeakers positioned around a listener was known in the art at the time of the invention as evidenced by Raydon et al (US 3,969,588) and Williams (US 3,757,046). However, the examiner has not found prior art that teaches or suggests the modification of the cited references in order to provide a system that allows a first and a second transition pattern to be selected to individually control each of at least four loudspeakers to create a sound transition effect between two audio works, as defined in the independent claims 21, 31 and 41. Other prior art has been cited herein regarding cross-fading of sound files, however the other prior art of record also fails to teach or provide suggestion to arrive the combination of the elements and steps presented in the independent claims, again when said elements or steps are collectively considered in regards to each claim. For at least the reasons listed above, the dependent claims are also allowed in view of their respective dependencies upon the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Wedan (US 3,873,779) discloses an electronic sound distribution system.
